

Transforming Swedish Health Care Data to the OMOP CDM

October 2017 - OHDSI Symposium

Maxim Moinat, Jolanda Strubel, Stefan
Payralbe, Marinel Cavelaars

Vocabulary Mapping

Concept Domain	Source Vocabulary	Target Vocabulary	Mapping type
Condition	ICD10-SE	SNOMED	automatic
Procedure	NOMESCO	SNOMED	manual
Drug	NPL	RxNorm (Ext.)	automatic
Provider Specialty	<i>Local codes</i>	Specialty	manual

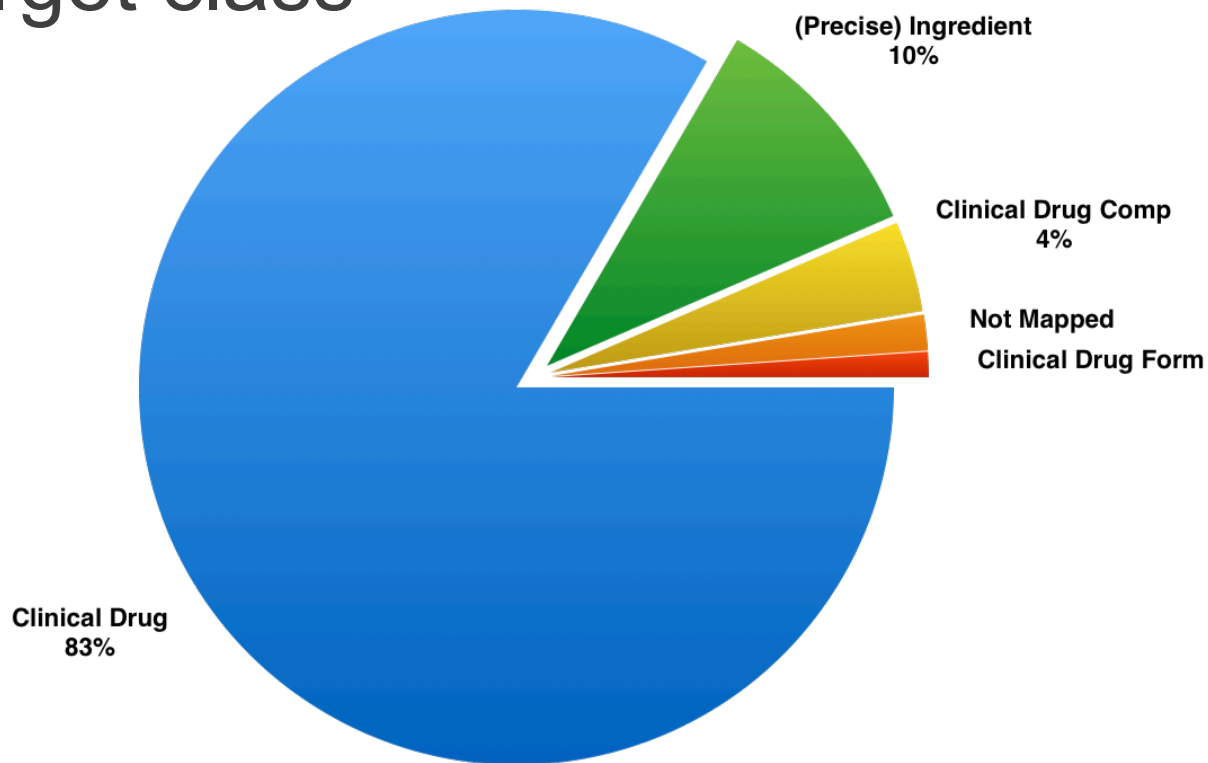

Vocabulary Mapping

Concept Domain	Source Vocabulary	Target Vocabulary	Mapping type	Coverage
Condition	ICD10-SE	SNOMED	automatic	99.5%
Procedure	NOMESCO	SNOMED	manual	13.6%
Drug	NPL	RxNorm (Ext.)	automatic	98.5%
Provider Specialty	<i>Local codes</i>	Specialty	manual	~100%

Drug target class

Mapping metrics

- Mapping Quality
 - Standardized expert review
 - Mapped lossless, up or down
- Percentage coverage 'to gain'
 - NOMESCO: +14.7% coverage by mapping top 10 unmapped concepts

- Quality score card

Domain	Source Vocabulary ID	Target Vocabulary ID	Unique Concepts	Coverage	To Gain	Quality
Drug	NPL Pack ID	RxNorm	67%	98.5%	0.9%	55
Condition	ICD10-SE	SNOMED	38%	99.5%	0.3%	87
Specialty	-	SNOMED	95%	100%	0%	100
Procedure	NOMESCO	SNOMED	7%	13.6%	14.7%	98

ETL decisions

- Multiple causes of death as observation
- Circumstances and place of death in addendum table

Death addendum

Column name	Type	Source Field
person_id	integer	DEATH.lpnr
alcohol	boolean	DEATH.alkohol
narcotic	boolean	DEATH.narkotik
work	boolean	DEATH.aolycka
abroad	boolean	DEATH.dodutl
surgical_procedure	boolean	DEATH.opererad
place_of_death_concept_id	integer	DEATH.dodspl

ETL decisions (*cont.*)

- Observation of a Marital Status

	Method 1	Method 2
observation_concept_id	Marital Status	Married
value_as_concept_id	Married	Yes

- Visit attributes as observation
 - Planned
 - Admitting from
 - Discharge to
