OHDSI China WG Introduction

Mui Van Zandt
• Started on December 2016
• The overall goal of this WG is to promote healthcare observational studies in China through data science and informatics approaches. More specifically, we want to:
  – Extend and customize OHDSI data science approaches (e.g., standards, knowledge bases, and software) to Chinese clinical data
  – Enable big data-based Investigation of important global healthcare problems by building large observational data networks in China
  – Promote international collaboration and education in biomedical informatics
WHO WE ARE

• WG Chair – Hua Xu
• Six sub-groups:
  – CDM and vocabulary: Guoqian Jiang, Cui Tao, Mui Van Zandt, Chunhua Weng, Lei Liu, Ling Zhang, Li Wang
  – Data analysis: Fei Wang, Yong Chen, Hui Lv, Lixia Yao
  – Natural language processing: Hongfang Liu, Buzhou Tang, Tianyong Hao
  – Software tools: Yonghui Wu, Xudong Lv
  – Privacy: Xiaoqian Jiang, Mengchun Gong
  – Community engagement: Yi Zhou, Jingsong Li
• 300+ participants from academic, government, and industry
WHAT WE DO

- CDM and vocabulary
  - Develop/translate ontologies in Chinese
  - Mapping between ontologies
- Data analysis
  - Analysis methods e.g., bias correction
- Natural language processing
  - Chinese clinical NLP system development
- Software tools
  - Chinese version of Atlas
- Privacy
  - Re-identification risk analysis
- Community engagement
  - Outreach, training, and collaborative studies
