Breakout Sessions (ATLAS, HADES, ETL)

OHDSI Community Call March 2, 2021 • 11 am ET

March/April OHDSI Community Calls

Date	Topic
March 2	Network Breakouts (ATLAS, HADES, ETL)
March 9	Working Groups Updates (Oncology, Psychology, NLP, Medical Devices)
March 16	Community Presentations (Theme: Advances in Patient-Level Prediction)
March 23	Focus Topic: OHDSI Work with FDA Best program
March 30	OHDSI Challenge
April 6	Open Network Studies
April 13	10-Minute Tutorials
April 20	Community Presentations (Theme: Local Impacts of OHDSI)
April 27	OHDSI Networking Session

Three Stages of The Journey

Where Have We Been? Where Are We Now? Where Are We Going?

OHDSI Partners with HL7

HL7 International and OHDSI Announce Collaboration to Provide Single Common Data Model for Sharing Information in Clinical Care and Observational Research

Health Level Seven International (HL7®) and the Observational Health Data Sciences and Informatics (OHDSI) network today announced a collaboration to address the sharing and tracking of data in the healthcare and research industries by creating a single common data model. The organizations will integrate HL7 Fast Healthcare Interoperability Resources (FHIR®) and OHDSI's Observational Medical Outcomes Partnership (OMOP) common data model to achieve this goal.

"We are excited to have the OHDSI community join this partnership with HL7 to evolve community standards around observational research and clinical care. These standards set the foundation for our mission of global, open-science research, and this partnership will accelerate the development of effective and safe treatments for diseases facing today's global population." - George Hripcsak

HL7 International CEO Dr. Charles Jaffe, M.D., Ph.D., underscored the significance of this partnership. "The Covid-19 pandemic has emphasized the need to share global health and research data." He continued, "Collaboration

with OHDSI is critical to solving this challenge and will help our mutual vision of a world in which everyone can securely access and use the right data when and where they need it."

The organizations will align their standards to capture data in a clearly defined way into a single common data model. This will allow clinicians as well as researchers to pull data from multiple sources and compile it in the same structure without degradation of the information. This endeavor has global implications with the potential to permit the clinical community to define the elements they need, package and share them in a consistent single structure.

"We are excited to have the OHDSI community join this partnership with HL7 to evolve community standards around observational research and clinical care," said George Hripcsak, MD, MS, OHDSI's coordinating center director. "These standards set the foundation for our mission of global, open-science research, and this partnership will accelerate the development of effective and safe treatments for diseases facing today's global population."

Abstract

Objective To estimate the proportion of patients hospitalized with COVID-19 who undergo dialysis, tracheostomy, and extracorporeal membrane oxygenation (ECMO).

Design A network cohort study.

OHDSI Shoutouts!

The CHARYBDIS 1.0 manuscript has been submitted for peer review, and is now available as a preprint via ResearchSquare.

Congrats to Kristin Kostka,
Talita Duarte-Salles, Albert
Prats-Uribe, Anthony Sena and
the ENTIRE CHARYBDIS team
on this important work!

VID-19 Preprints

OHDSI 2021 SYMPOSIUM

Save The Dates

The 2021 OHDSI Symposium will be held Sept. 12-15, with the main symposium taking place Sept. 13.

More details will be announced when available, but please save those dates for the highlight event of the OHDSI year! #JoinTheJourney

Upcoming Workgroup Calls

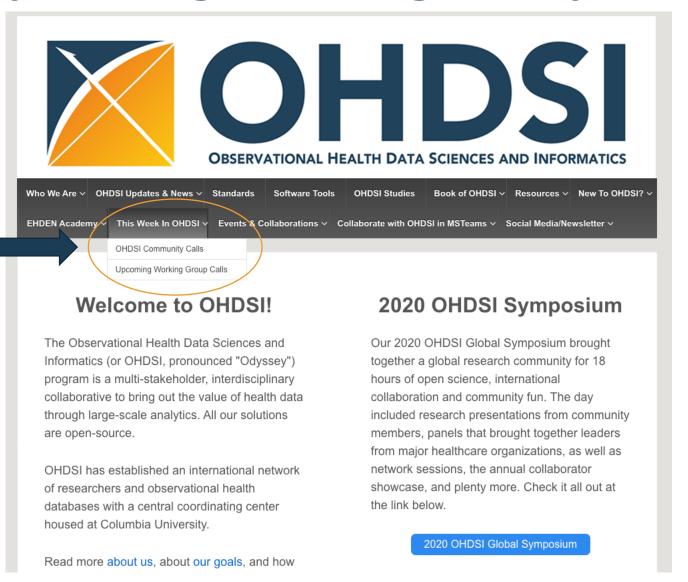

Date	Time (ET)	Meeting
Today	1 pm	Common Data Model
Today	3 pm	OMOP CDM Oncology – Outreach/Research Subgroup
Wednesday	10 am	OMOP CDM Oncology – Development Subgroup
Wednesday	2 pm	GIS – Geographic Information System
Wednesday	4 pm KST/2 am	Patient-Level Prediction/Population Level Estimation (Eastern Hemi)
Thursday	8 am	Psychiatry
Thursday	12 pm	Patient-Level Prediction/Population Level Estimation (Western Hemi)
Thursday	1 pm	OMOP CDM Oncology – CDM/Vocabulary Subgroup
Friday	10 am	Clinical Trials
Friday	10 am	Electronic Health Record
Tuesday	9 am	OMOP CDM Oncology – Genomic Subgroup

About Northeastern:

Founded in 1898, Northeastern is a global research university and the recognized leader in experience-driven lifelong learning. Our world-renowned experiential approach empowers our students, faculty, alumni, and partners to create impact far beyond the confines of discipline, degree, and campus.

Our locations—in Boston; Charlotte, North Carolina; London; Portland, Maine; San Francisco; Seattle; Silicon Valley; Toronto; Vancouver; and the Massachusetts communities of Burlington and Nahant—are nodes in our growing global university system. Through this network, we expand opportunities for flexible, student-centered learning and collaborative, solutions-focused research.

Northeastern's comprehensive array of undergraduate and graduate programs—in a variety of on-campus and online formats—lead to degrees through the doctorate in nine colleges and schools. Among these, we offer more than 195 multi-discipline majors and degrees designed to prepare students for purposeful lives and careers.

About the Opportunity:

The Observational Health Data Sciences and Informatics (OHDSI) Center at the Roux Institute is a new Administrative Hub created to provide operational and educational programs to the OHDSI community. It works tightly with the OHDSI Coordinating Center at Columbia University to advance OHDSI's research mission of improving health by empowering a community that collaboratively generates evidence that promotes better health decisions and better care.

Responsibilities:

To fulfill this mission, the OHDSI Center facilitates OHDSI's radically open and grassroots character of OHDSI, creates an incubator for independent projects, formalizes community representation in decision making, provides a mechanism for engaging in formal agreements with academic and commercial collaborators, fosters work that requires dedicated funding, and creates formalized and accredited curricula that lead to competencies recognized as essential for using community resources to a standard of excellence. The OHDSI Center seeks to attract world-class researchers, engineers, designers, and students working on healthcare's front lines, with deep expertise and unique insights into new breakthrough opportunities. We are seeking a Director to drive this new Center at the Roux Institute in Portland, Maine.
