Who benefits how?

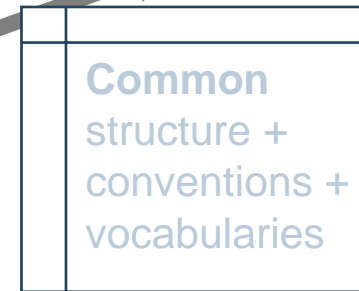

Other standards

Higher flexibility
Definition syntax + some common model
Each trial different

No flexibility

Higher flexibility
Definition syntax + some common model
Each patient different

Summary

- A Common Data Model needed for standardization
- There are different degrees of standardization
- The higher the standardization
 - The easier it is to run observational studies
 - The harder it is to transform data
 - The less flexible the model becomes

Use the OMOP CDM and the OHDSI Network
for global observational research!
