Adam's detailed profile is available at www.BinaryHealthCare.com/Adam/

Contributors

- Almost all of the work performed at HL7 is done by volunteer participants

  - Open to anyone
  - Wide range of perspectives - software developers and vendors, clinical, patients and care-givers, academic, insurance, government, pharmaceutical, etc.
  - Membership is a required to take on an official leadership role and/or to be able to participate in the formal voting on proposed standards for free

Data Standardization from the HL7 Prospective

- A 'standard' is only valuable insofar as it is adopted, and that the adoption achieves the outcomes the standard was created to achieve

- To meet the objective of adoption and achieving desired outcomes, the standards process must do five things:
  - Foster consensus,
  - Ensure content is fit for purpose,
  - Ensure content is implementable,
  - Establish an appropriate implementer community, and
  - Ensure ongoing maintenance of the standard.
