

Increasing the 'Open' and 'Community' in an Open Community Data Standard, the OHDSI Standardized Vocabularies

06-June-2023

Alexander Davydov Anna Ostropolets Christian Reich & Vocabulary Team

Overview of the talk

Landscape assessment of community needs Committee and improvement process

Roadmap and releases

Community involvement and contribution

Landscape assessment: What does the community need?

Landscape assessment

Conducted in Jan - Feb | 2 parts: overall and data-source specific |Community commented on the draft in Mar - Apr 2023

What we asked about

- Which vocabularies you use in ETL, research or development
- Problems you encountered with Vocabularies completeness and correctness
- Problems you encountered with Vocabularies recency and updates (versioning, upload/download)
- What you like to see improved

Landscape assessment

Part I: 188 responses from 144 institutions | Part II: Vocabularies use in 60 data sources

FINDINGS

- 87% of the community feels confident about Vocabularies' integrity (to be used as a benchmark)
- Most used vocabularies: SNOMED, ICD
 9/10(US and int. versions), MedDRA, ICDO3,
 ATC, RxNorm / RxE, ICD10PCS, ICD9Proc,
 CPT4, LOINC, CVX, HCPCS, UCUM, NDC,
 NAACCR, Cancer Modifier
- Most of the community updates their data annually or semi-annually

Vocabulary		Used in data	Used in	
vocaoulary			research 💌	
SNOMED		57%	86%	
RxNorm		33%	79%	
ATC		45%	62%	
ICD-10PCS		43%	51%	
LOINC		68%	25%	
ICD-9-Proc		48%	43%	
CPT4		50%	40%	
HCPCS		42%	33%	
ICD-9(CM)		62%	<10%	
ICDO3		32%	35%	
ICD-10(CM)		57%	<10%	
RxNorm Extension		<10%	53%	
ICD-10 (int. versions)		48%	<10%	
NDC		33%	<10%	
MedDRA		10%	24%	
ICD-9 (int. versions)		28%	<10%	
NAACCR		17%	15%	
CVX		18%	13%	
UCUM		<10%	26%	
Cancer Modifier		<10%	25%	
HemOnc		10%	14%	
OncoTree		10%	11%	
Medicare Specialty		15%	<10%	
Revenue Code (CMS)		15%	<10%	
CMS Place of Service		13%	<10%	
CDT		12%	<10%	
DRG (CMS)		12%	<10%	
Multum		12%	<10%	
NCIt		12%	<10%	
NUCC		12%	<10%	
ABMS		10%	<10%	
dm+d		10%	<10%	
OncoKB		10%	<10%	
ClinVar		<10%	10%	
Nebraska Lexicon		<10%	10%	
HGNC		<10%	10%	

Landscape assessment

Part I: 188 responses from 144 institutions | Part II: Vocabularies use in 60 data sources

NEEDS

- Transparent release schedule, tools for vocabulary changes, versioning
- Transparent & robust quality assurance and control procedures
- Better coverage and comprehensive hierarchies
- More documentation, incl. educational materials

Vocabulary Committee

Oversees the improvement activitiesOutput and decisions are communicated to the community

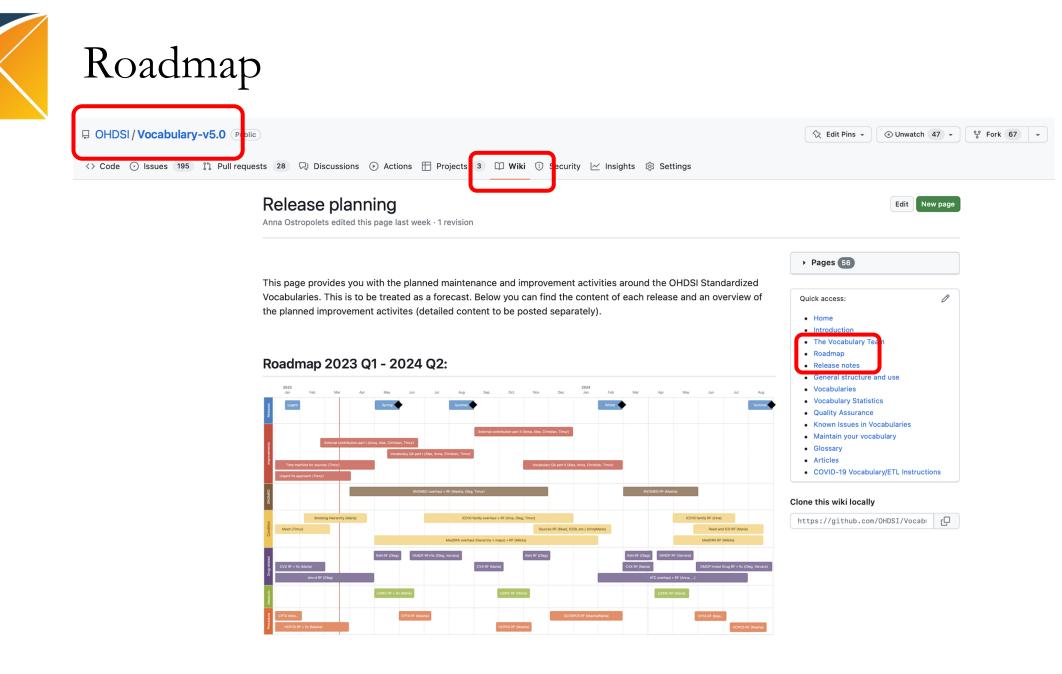

Vocabularies process improvement activities

- 1.Landscape assessment of community needs
- 2.Roadmap and release schedule
- 3. Documentation & guidelines (developer, end-user, community contribution)
- 4. Quality framework and QA system
- 5.Vocabulary versioning
- 6.Common development infrastructure
- 7.Better code and automation (better machinery)
- 8.Vocabulary one-stop-shop and self-service

Roadmap: Stable and transparent release schedule

Roadmap

1. Stable cadence

As most of the community members refresh the Vocabularies and the data annually or semi-annually, the cadence of releases is twice a year. Such a schedule has a higher productivity, transparency in the content of the releases, and better version alignment in the community. Two releases (August and February) correlate with the source release schedule. An intermediate release in May 2023 is planned for work already accomplished.

2. Combination of maintenance and process improvement

Vocabulary work balances:

- Routine maintenance,
- · Automation, usually across concepts and vocabularies of one domain at a time (overhauls, machinery improvements, etc.),
- Process improvement (e.g., community contribution guidelines or version control).

3. Prioritization based on the needs of the community

The roadmap is based on a continuous need assessment of the community, both in terms of vocabulary maintenance as well as process improvement.

Improvement activities

Vocabulary-specific overhauls and improvements include:

1. SNOMED overhaul

- Stable domain and concept class id assignment.
- Alignment of the validity dates with the source.
- Fix of the problem with replacement relationships (such as "Concept replaced by") not having "Maps to" links that prevent the users from automatically following the "Maps to" relationships from non-standard to standard counterparts.

2. ICD family improvement

- Mapping re-use across ICD family to identify the discrepancies and similarities across different versions of ICD and improve the consistency of mappings.
- Incorporation of the mappings provided by SNOMED-CT and other sources.
- Fix of the source (CIAML) file processing to capture the ICD concepts currently missing.

Activities per release

The plan for 2023 Q1 - 2024 Q2 includes the refreshes of the following commonly used vocabularies: SNOMED-CT, ICD family, Read, RxNorm, CVX, LOINC, HCPCS, ICD10PCS,

MedDRA, MeSH, NAACCR, dm+d, as well as improvement activities tailored to the most commonly reported problems described above.

Table 1 outlines the vocabularies included in each release as per the roadmap above.

Table 1. Vocabularies and activities included in each release.

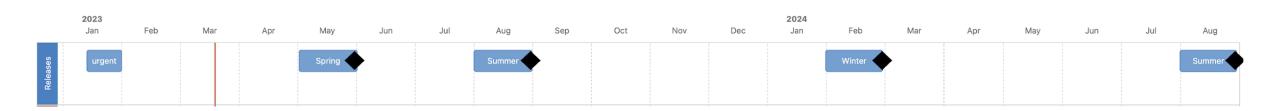

Activity	Vocabulary version and modification	Name
Spring release, May 2023		
CVX	refresh (20230222 version) and refactored code	Maria, Timur
dm+d	refresh (20220927 version) and refactored code	Oleg, Timur
HCPCS	improvement + refresh (Apr 2023 version)	Masha, Timur
MeSH	refresh (2022 version) and refactored code	Timur
NAACCR	mapping addition	Vlad, Timur
NDC	refresh (20230319 version)	Oleg
RxNorm	refresh (20230306 version)	Oleg, Timur
RxNorm Extension	refresh (May 2023 version)	Oleg
Smoking hierarchy	mapping addition	Maria, Timur
SPL	refresh (20230319 version)	Oleg

Roadmap: stable cadence

Enables more transparency and allows users to better plan their activities

• Two major releases aligned with the source refresh schedule - August and February (planned on the roadmap now: August 2023, February 2024, August 2024)

RxNorm update

Maintenance: Aug 2023 and February 2024 releases

August 2023	February 2024		
CPT4 refresh	CVX refresh	SNOMED overhaul	
LOINC refresh	LOINC refresh	and refresh (UK, US, Int)	
NDC refresh	NDC refresh	<i>ICD10 improvement</i> + refresh	
RxNorm refresh	RxNorm refresh	(ICD10CM, ICD10, ICD10CN,	
RxNorm Extension update		ICD10GM, CIM10)	
L	RxNorm Extension update	MedDRA <i>improvement</i> + refresh	
SPL refresh	SPL refresh	Read mapping refresh	
VANDF refresh	HCPCS refresh	ICD10PCS refresh	

August 2024: refreshes of vocabularies above + ATC overhaul

More information: Vocabulary-v5.0 GitHub Wiki <u>bit.ly/43q8vc6</u>

Roadmap: vocabularies

Vocabularies on maintenance: ATC, CPT4, CVX, HCPCS, ICDs (10, 10CM, 10GM, 10PCS, CIM10, KCD7), LOINC, MedDRA, OMOP Invest Drug, RxNorm, RxNorm Extension, SNOMED, VANDF + administrative/supportive vocabularies (type, status).

Obsolete vocabularies: CCS, Cohort, Cohort Type, Condition Type, Cost Type, Death Type, Device Type, Drug Type, Episode Type, Meas Type, Multilex, NDFRT, Note Type, Obs Period Type, Observation Type, OXMIS, Procedure Type, SMQ, Specimen Type, Visit Type.

Vocabularies no longer maintained:

- Oncology: Cancer Modifier, CAP, HemOnc, ICDO3, NAACCR, Nebraska Lexicon, OncoTree, OMOP Genomic group (OncoKB, CGI, CIViC, ClinVar, JAX, HGNC, NCIt).
- Source: AMIS, AMT, BDPM, CCAM, CIEL, CTD, dm+d*, DPD, EDI, EU Product, GCN_SEQNO, Gemscript, GGR, GPI, JMDC, KDC, KNHIS, MeSH*, Multum, NCCD, OPS, PCORNet, SUS, UK Biobank, VA Class.
- Standard/Classification: APC, CDT, DRG, EphMRA ATC, ETC, Indication, MDC, NFC, OPCS4, OSM, US Census, SNOMED Veterinary.
- * refreshed one last time.

Community contribution

- Rolled out in two parts
- First part focuses on the use cases that can be incorporated through filling the templates
- We created documentation on GitHub, templates and a pipeline to follow

Community contribution Part I: currently supported use cases

ADD NEW CONTENT

Does not impact the rest of the community Can be incorporated quickly (no review)

- Adding *non-standard* concepts to existing vocabularies
- Adding synonyms to existing concepts
- Adding new mappings
- Adding *non-standard* vocabularies

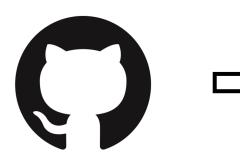

MODIFY EXISTING CONTENT

Impacts community as already is used by others Requires review of the Vocab Team & other WGs/broader community

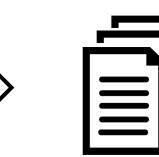

- Modifying existing mappings
- Modifying concept attributes (e.g., domain)
- Promoting non-standard concepts to standard

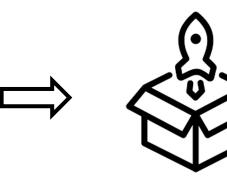

Community contribution: pipeline

Create issue on Vocabulary GitHub (cat: Add content; Modify content) Describe your use case and proposed contribution

Choose the template, download and fill

- Content
- Meta-data
- Checklist (QA)

Submit the template to Google Drive

Come to review session if needed

Modify and re-upload if needed

See the contribution in the next release!

If submitted and approved at least **2 months prior to release (end of June for the next one)**

Community contribution

What to do...

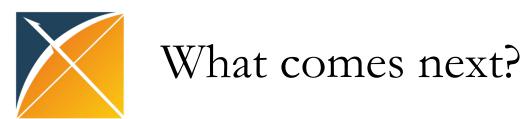

If your use cases are supported?

Submit a GitHub issue!

If your use cases are YET not supported?

Talk to us!

3	Community contribution - add new content Use this issue to submit new content to the Vocabularies	Get started
	Faulty content Feature request Create a report to help us improve the content	Get started
	Community contribution - modify existing content Use this issue to propose modifications to the existing content of the Vocabularies	Get started

- We are gathering requests for contribution for dry runs by the end of June!
- June 13 WG meeting: please come with your questions.
- Quality assurance and control improvements to follow.
