Table 1: Overview of the types of questions we would like to answer using PROMS data, and what the results could look like.

TYPE OF QUESTION(S)	OUTPUT IDEAS
Amongst my target cohort, how does a given PROM develop over time/score at time T? (Disease Natural Progression) Examples: Amongst patients with diabetes, how does impact on work, relationships, or sleep (e.g. ICF categories) develop over time? Amongst patients with basal thumb arthritis starting with conservative treatment, how does pain scores develop over time for? Example: Amongst cancer patients (per tumor type), how does sex interest score at 6 months? Amongst patients with type 1 diabetes using an insulin pump, which emotional outcomes are experienced over time?

OHDSI Europe Community Calls

Welcome to the OHDSI Europe community call, a new meeting that will be held the second Thursday of each month at 1 pm CET. These calls will provide updates around OHDSI Europe, as well as research presentations, community updates, brainstorm sessions, networking opportunities, and plenty more. Newcomers and veterans alike are all invited to this get-together for the OHDSI Europe community.
